

Dear Sirs;

I Purchase satellite radio for the simple reason that standard radio format is repetetive, boring, and driven by a select few.

I choose to pay for the service they provide, and by radio industry stiffling their services they are holding a monopoly in a industry I already detest. Please let satellite radio bradcast weather, traffic, and keep giving me what I'm paying for, not what the radio industry wants me to hear.

And crooked politicians whose pockets are being filled by to get their agenda accross.

Luis Lopez
